—

Step One:

First bite

- Start with North America, only 4 languages to cover.
- NO APIs, keep bugs local
- Single user UI

—

Step Two:

Home page

- Clickable political map
- Translation display box
- Search box

—

Step Three:

Server

- Node
- One route per language

—

Step Four:

Database

- Mongo
- Pre populated

Step Five:
PROFIT

- alaska
- canada west
- canada east
- murica
- mexico

Search by country

MVP

Bare bones:

- English, French, Spanish only
- HTML hardcoded map
- Minimal server and db
- Basic idea comes across
- Missing item most likely to evolve
